Subject RE: Review of Workplan Addendum

Chris,

the DTSC memo dated May 31, 2005 seems to be confusing several (at least three) OPOG/CDM documents.

In the subject line, the memo states that the reviewed document is Revised Onsite Soils Work Plan Addendum No. 2 , Phase 1A Area, dated March 9, 2005. In fact, OSS WP Addendum No. 2 was dated April 8, 2005. The only OPOG/CDM document dated March 9, 2005 was the Revised Report Addendum for Additional Data Collection in the Phase 1A Area.

As you noted, the memo states in the Introduction that DTSC comments of May 6, 2005 have not been incorporated in the revision. These comments were on the groundwater EECA, not on the on-site soils RI/FS.

Comment 1 refers to Section 2.1. This section is not included in the OSS WP. It seems that DTSC is referring to the Revised Report Addendum. Similarly, all subsequent comments seem to be on the Revised Report Addendum, not on the OSS WP.

It would be more effective for DTSC to review and comment on the Revised Report Addendum dated March 30, 2005 because this later revision incorporates EPA's comments on the March 9, 2005 report. It would also be helpful to make the comments more specific (e.g., list the subject deep wells in Comment 5, specify the "evidence for large amounts of hydrocarbons" in Comment 13, explain the reasons for the "large source of organic carbon" in Comment 14, etc.).

The DTSC comments refer back to their comments on the EECA and the memo notes that these have not been incorporated. DTSC applies these comments to all the three documents. I would like to suggest that EPA recommend to DTSC to bring their geologist to the next meeting with OPOG/CDM; DTSC's comments would then be discussed with the entire group.

None of the comments seem to be on the OSS WP. EPA may want to solicit DTSC's comments on the OSS WP.

Please let me know if you have any questions.
Tom
